Mahan Project Manager's ICOLD Symposium Paper to be Published

C.J. Mahan Construction Company, LLC. proudly announces that the Smithland Cofferdam Project has been selected to be published in a special edition of the International Journal on HydroPower & Dams, an edition which will feature some of the best industry studies from across the United States. The paper, titled 'Performance Monitoring During High Water, Intentional Flooding, and Unwatering at the Smithland Hydroelectric Project', is a joint effort between Mahan and Paul C. Rizzo Associates, Inc.

The research paper, commissioned by the International Commission on Large Dams (ICOLD) Symposium highlights the unique challenges and creative solutions that Mahan and its partners implemented to meet the challenges at the Smithland HydroElectric Project.

The journal, available in late July, reaches readers in more than 180 countries. It features research papers, descriptive case studies, project updates, business and financial news, and policy papers aiming to help advance the state-of-the-art of dam engineering and hydroelectric development.
