Indian Lake Spillway Replacement Awarded to Mahan

C.J. Mahan Construction Company, LLC has been awarded a contract by the Ohio Department of Natural Resources to construct dam improvements and replace the 700-foot long concrete spillway at Indian Lake Park in Logan County, Ohio. The \$7.6 million dollar project will not affect the lake long term and nor will it disrupt activity on the lake in the upcoming summer tourist season.

The new concrete spillway, with its labyrinth design, is expected to be 16 percent more efficient and will be the first of its kind in the State of Ohio. It will continue to have the same crest elevation and dimensions as the existing spillway, resulting in no change to the current lake levels.

Project completion is scheduled for Spring, 2018.
